

The Driver of Energy Transition

Pertamina, as the largest energy state-owned company in Indonesia, has a high commitment to support the government's targets. Pertamina's NRE development initiatives to support this target include increasing the installed capacity of self-operated geothermal to 1,128 MW by 2026, developing solar and wind power plants, as well as blue hydrogen.

Nicke Widyawati

President Director & CEO PT Pertamina (Persero)
